

Cobweb's Power App Creation

Let Cobweb automate your business processes
with the Microsoft Power Platform

The Microsoft Power Platform combines the robust power of PowerApps, PowerBI, and Power Automate into a single capable business application platform – providing quick and easy app building and data insights.

Whether you're looking to build a solution for managing expenses, holiday entitlement, purchase orders, inventory management, on-site servicing or a multitude of other processes, then look no further than the Microsoft Power Platform.

With Cobweb's Power App Creation service, businesses can entrust the design and implementation of these applications to Cobweb's experienced Power Platform team.

Microsoft Power Platform

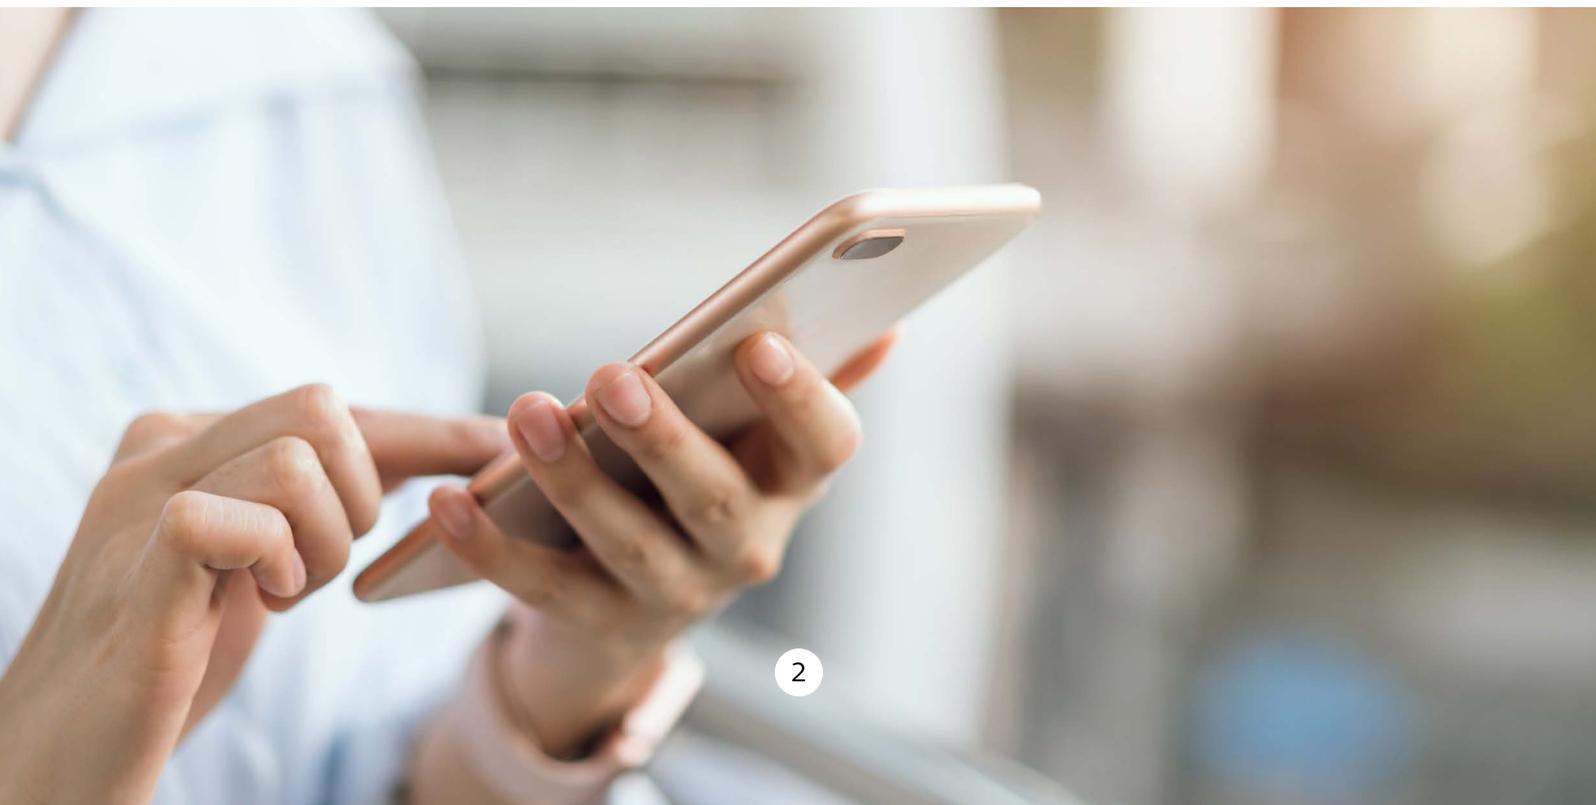

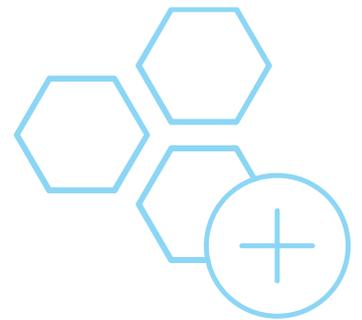

The Microsoft Power Platform provides the functionality to create and present the automated business processes:

Microsoft Power Apps and Power Automate (previously known as Flow) are features available within Office 365, and provide the functionality to create the workflows and processes.

Power BI is Microsoft's suite of cloud-based business analytics tools. Not all Cobweb's Power App designs will require Power BI, but – depending on the individual process – some will benefit from the visualisation and metrics provided by Power BI.

Why automate with Cobweb's Power App Creation?

Utilising Microsoft's development platform, apps, services and connectors, enables Cobweb's team to build feature-rich, customised business processes, integrating with and connecting to your business data stored in the cloud or on-premises, in Microsoft sources (SharePoint, Excel, Office 365, Dynamics 365, SQL Server, etc.) or other vendor applications.

With Cobweb's Power App Creation service:

Replace cumbersome, time-intensive manual processes with an automated, modernised process, tailored to your specific needs

Eliminate the cost and time expense of creation via an independent software developer

We'll create a user experience that your users will find familiar and engaging

We will leverage your existing data sources and supplement them if required

The Cobweb team has extensive experience working with the Microsoft Power Platform - Power Apps, Power Automate and Power BI.

The Power App Creation Service

Proposal Stage:

Our team holds a workshop on-site with your key stakeholders, to identify the business process/es to automate, the use cases, data sources and automation opportunities. Following the workshop, we provide a fully costed proposal to outline how we'll create your Power App.

How do we engage?

The Power App creation engagement has three main phases:

Preparation:

During the preparation phase, for each business process to be automated, our team will:

Review the existing manual process

Map the current business process flow

Carry out a use case analysis - identifying any role specific process additions or exceptions

Identify the data sources - whether existing or to be created, on-premises or online.

Development:

During the development phase, the Cobweb team will:

Connect to existing data sources

Create any additional data sources

Implement the individual processes within the overall process - for example, add functions, edit, delete, approvals, order)

Implement the process automation

Secure your Power App using Office 365 identity functions - authorising as defined for role or job function

Design the user experience - including to enable mobile and/or PC access

Brand your Power App - with logos and colour styles.

Test:

During the test phase, our team will:

Perform a series of user acceptance tests, to include each use case

Validate the data

Validate the process flows - ensuring each process element is functioning fully, and the data is where it should be.

Next Steps

About Cobweb

Cobweb is one of Europe's largest cloud solutions providers. Founded in 1996, the company draws on in-depth expertise and decades of experience in what is now known as cloud, empowering organisations of all sizes to grow into flexible, agile businesses through the deployment of best-of-breed cloud technologies.

A member of the Cloud Industry Forum and a Microsoft Gold Certified Partner, Cobweb was the first provider in Europe to deliver Microsoft cloud services through the Microsoft Cloud Solution Provider programme. The company prides itself on innovation and liberating its customers and partners through technology. This is backed up by UK support and advice 24 hours a day, 365 days per year. Based in London and Dubai, with an operations centre on the south coast, Cobweb is a British company with a global outlook.
